Festoon Lighting & LED Pea Lighting

We stock over 2km of festoon lighting and 500m of fairy lighting. Available in lengths of 5m, 10m & 25m that can all be connected together to get the total length you need.

- The festoon is fitted with a bulb every metre whereas the Fairy lights have a bulb every 10cm. They are warm white in colour. The strings can be hung in trees or between buildings to create a canopy of light above you and is an extremely soft and atmospheric way of lighting paths or highlighting features.
- Thanks to the low power LEDs, the entire system can be powered from a car battery & inverter in remote locations or connected to the mains. We can also fit light sensors so as to not spoil the surprise in the daytime and light up the space once it's dark automatically.
